- APPENDING SERVICES A SHORT DESCRIPTION
- CASE STUDIES

RBS B2B SOLUTIONS maintains one of the world's most comprehensive and up to-date databases of key decision makers and influencers, based on information covering over **38 MILLION BUSINESS PROFESSIONALS**. This means that RBS can profile, target and access business decision makers across a wide variety of job functions, all underpinned by research and practical experience. Our extensive and ongoing research Programs give you the unique ability to build contact lists that identify individuals at all stages of the buying cycle, from pre-sales to sales-ready, in a wide range of products and services bought by businesses. We provide this information from over **170 countries**, covering active and emerging markets for a complete range of corporate roles.

In addition to being able to access an exceptional breadth and quality of data, working with us means you can also benefit from a wide range of **segmentation services** using our data to ensure your targeting is perfectly refined.

RBS offers a unique ability to businesses targeting both existing and emerging markets, to access the key decision makers, understand the nuances of their cultures, and develop focused and relevant content to gain their interest and attention.

DATA COMPILATION & OPT-IN PROCESS

- **窗** WEB-BASED REGISTRATION AND/OR OFFERS
- BUSINESS TRADE MAGAZINE SUBSCRIPTIONS

MAINTENANCE

REGULAR DATABASE MAINTENANCE THAT KEEPS DYSFUNCTIONALITY AT BAY, KEEPING YOUR DATA FRESH AND RELEVANT TO EXTRACT THE MAXIMUM ROI!

PRE-DELIVERY VALIDATION

INCREASE DELIVERABILITY, PROTECT SENDER REPUTATION, IMPROVE EMAIL MARKETING PERFORMANCE... UTILIZE DATA AS AN EFFECTIVE SERVICE

PRE-DELIVERY TESTING

Data will be verified against Informatica's **Strike Iron** before being delivered. Its evidence-based approach and proprietary, self-learning algorithms to locate email domains involved with spam networks, traps, and other malicious threats, using knowledge from over a decade of analysis and experience.

EMAIL VERIFICATION

Emails validated using **BriteVerify** can reduce your bounce rate by 98% and help your messages get delivered, thus protecting the sender reputation. It determines if the email address follows the correct syntax and has the physical properties of an email address, and connects directly to the email server to authenticate if the email address exists on the server.

MANUAL VALIDATION

Our Data Analysts decide what needs to be done with the suspect values, retain them as valid, reject them as invalid, or replace them with valued values; thus ensuring he data is ready for migration and support your system (Your CRM or Marketing Automation Tool).

PRE-DELIVERY REAL-TIME CAMPAIGN

We re-verify your list at the time of the order and send an opt-out email for those who do not want to be emailed. This increases the quality of your list.

POST-DELIVERY MAINTENANCE

ACCORDING TO GARTNER, POOR DATA QUALITY CAUSES 40% OF ALL BUSINESS INITIATIVES TO FAIL. AND, ONE-FOURTH OF YOUR COMPANY DATA IS GOING BAD EVERY YEAR!

HOW OUR POST-DELIVERY MAINTENANCE UPS YOUR MARKETING PERFORMANCE CURVE

DATA APPENDING SERVICES

- PROFESSION & INDUSTRY-BASED SEGMENTATION
- INTRICATE TECHNOLOGY INTELLIGENCE APPENDING

In addition to being able to access an exceptional breadth and quality of data, working with us means you can also benefit from a wide range of **APPENDING & SEGMENTATION SERVICES** to ensure your targeting is perfectly refined.

SUCCESS STORIES

INTRODUCTION TO B-BIG

RapidFireTools

OBJECTIVE:

To sign up more MSPs and VARs for their channel recruitment and Partner Program.

CONCERN:

The Marketing Team at RFT were using Data.com as their data source and were not happy with the results as the only way they could pull the names was through SIC code search. That option was never going to pull accurate data and most of their efforts were wasted in reaching out to the wrong companies.

RESULT:

RBS B2B SOLTIONS not only provided RFT with net new contacts of MSPs and VARs that have been identified by Research Methodology and not just SIC codes but also cleansed their in-house file and identified the companies as MSPs providing with updated records which resulted in significant increase in open rates and click-through from their targeted campaigns.

OBJECTIVE:

ConnectWise target Channel Partners to sell their products, and do not market to end-users. They wanted more market ready leads for their highly targeted campaigns.

CONCERN:

Just like RFT, the Marketing Team at ConnectWise were not happy with their current vendor to provide them a dataset of MSP, VAR, SI, MSSP, CSP and IoT vendors.

RESULT:

They were very excited when they learnt that we can deliver them the MSP dataset based on Research and not by running SIC codes. They saw a significant increase in ROI by using our data and have agreed to use us as their long term data partner.
